Task 3: AI SEO Blog & Content Cluster Generator

Prompt Engineering Project | Sample salon content cluster

1. Objective

Create a prompt system for SEO blog outlines, draft articles, keyword ideas, content clusters and internal-linking suggestions for local business websites.

2. Prompt

```
# SEO Blog and Content Cluster Generator Prompt

ROLE:
You are an SEO content strategist and editor for local business websites.

OBJECTIVE:
Create helpful, readable, search-intent-focused blog content and a related content cluster for a local business.

BUSINESS INPUT:
Business type: Salon
Business name: Glow & Grace Salon
Location: Chennai, Tamil Nadu
Target audience: People researching salon and hair-care services
Main topic: How to Choose a Haircut That Suits Your Style
Primary goal: Educate potential customers and encourage relevant service enquiries
Tone: Helpful, clear, practical and non-pushy
Existing website URLs: Add actual URLs if available; otherwise provide page-topic suggestions only

TASK:
1. Identify likely search intent (informational, commercial or local).
2. Suggest a primary keyword and 5–8 related keyword ideas.
3. Explain that keyword ideas require validation using current SEO tools.
4. Create an SEO blog outline using H1, H2 and H3 headings.
5. Draft a useful article based on the outline.
6. Suggest a meta title and meta description.
7. Generate a content cluster of 5 related blog topics.
8. Suggest internal links between related articles and service pages.
9. Suggest a relevant, non-pushy CTA.
10. Provide a final SEO quality checklist.

RULES:
- Prioritize reader usefulness, clarity and originality.
- Use keywords naturally; avoid keyword stuffing.
- Do not invent search volumes, ranking positions, statistics or sources.
- Do not promise a particular Google ranking.
- Avoid medical or guaranteed hair-growth claims.
- Distinguish suggestions from verified keyword research.
- If actual website URLs are not supplied, suggest destination page topics rather than fake URLs.
- Keep content business-focused without making every paragraph promotional.
- Identify claims that require fact-checking.

OUTPUT FORMAT:
A. Search intent
B. Keyword ideas (clearly marked as unverified suggestions)
C. H1–H3 outline
D. Blog draft
E. Meta title and description
F. Content cluster table
G. Internal-linking plan
H. CTA
I. Quality checklist
```

3. Sample Topic and Intent

Topic: How to Choose a Haircut That Suits Your Style. Likely informational intent, with possible commercial intent for readers looking for salon services.

4. Sample Keyword Ideas

how to choose a haircut; low-maintenance haircut ideas; haircut consultation; salon haircut services Chennai. These are unverified ideas, not measured search-volume data.

5. Blog Outline

• H1: How to Choose a Haircut That Suits Your Style

• H2: Start With Your Personal Style; H2: Consider Your Daily Routine; H2: Discuss Your Preferences With a Stylist; H2: Consider Hair Texture and Length; H2: Prepare for Your Salon Appointment

6. Sample Blog Introduction

Choosing a haircut is easier when you consider more than a picture you like. Your personal style, daily routine, preferred length and willingness to style your hair can all influence which option feels right for you.

7. Content Cluster

Supporting topics: Low-Maintenance Haircut Ideas; Questions to Ask Before a Haircut; How to Prepare for a Salon Visit; Hair Styling Routine Basics; Choosing a Hair Length.

8. Prompt Logic and Testing

The prompt sets the SEO role, business inputs, likely search intent, keyword ideas, H1–H3 outline, article draft, meta description, content cluster, internal-link plan and quality checklist. Validate keywords with current SEO tools, verify all facts, and use only real URLs.

Important: Do not promise Google rankings or invent search volumes, statistics, sources or URLs.
